ELECTION OF PRESIDENT CAMPBELL

On January 4, at a special meeting of the Regents, Dr. W. W. Campbell, Director of the Lick Observatory, was elected President of the University.

Dr. Campbell was graduated from the University of Michigan in 1886, with the degree of Bachelor of Science. He also holds the degrees M.S. (University of Michigan, 1899); Sc.D. (Western University of Pennsylvania, 1909); LL.D. (University of Wisconsin, 1902); Sc.D. (University of Michigan, 1905); and Sc.D. (University of Western Australia, 1922).

Since 1891 Dr. Campbell has been continuously associated with the University as Astronomer in the Lick Observatory (1891–); Astronomer in charge of Lick Observatory (August 12, 1900–September 12, 1900); Acting Director, Lick Observatory (September 12, 1900–January 1, 1901); Director of the Lick Observatory (January 1, 1901–). With the assumption of his duties as President of the University on July 1, 1923, Dr. Campbell will continue as Director of the Lick Observatory in charge of the general policies of the institution.

DEATH OF EX-PRESIDENT REID

William Thomas Reid, fourth President of the University, died at his home in San Francisco on December 19, 1922. The Regents of the University, assembled in regular session at San Francisco, January 9, 1923, made the following statement concerning the life and services of Mr. Reid:

Born, November 8, 1843, the youth received his early training on his father's farm in Illinois, which he left in his nineteenth year to serve in the Union army. He was graduated from Harvard in 1868. There followed thirteen years of service as headmaster of important high schools, including the Boys' High School of San Francisco, from which post he was summoned, somewhat against his will, to the high office of President of the University of the State.

The period of Mr. Reid's elevation to the presidency was a time of violent reaction from the earlier successes of the institution. Firm public support was wanting. The new president was faced by active opposition both within and without the University. The future of the institution was in grave peril.

Despite these handicaps, his presidency was marked by constructive measures, whose beneficent effects have been felt until the present day. Those years brought important private endowments, and witnessed the

rehabilitation, under the University accrediting system, of the public high schools of California. During President Reid's administration, distinguished names were added to the faculty, among them Howison and Stringham, of beloved memory.

Following his retirement from the presidency, Mr. Reid continued his distinguished career as an educator, founded the Belmont School for Boys, and was for more than thirty years its headmaster and a potent influence for good in the lives of hundreds of the young men of the State.

No president of this or any other university ever possessed greater earnestness of purpose, or gave to his great task more unreservedly of his time, his thought, and his substance. Of sterling character, simple and unostentatious in his contact with his fellows—the unselfish life of William Thomas Reid has stamped its impress upon this University and upon the citizenship of California.

RESOLUTION ADOPTED BY BOARD OF REGENTS

The Regents of the University, at their regular February meeting held in Los Angeles on February 14, adopted the following resolutions outlining their policy for the development of higher education in California:

1. That the higher education of the State should be under the direction and control of a single Board of Regents selected as the present Board is selected.

2. That there is and should be but one State University in California and that institution, the University of California, should be maintained at its full efficiency. There is no room for another state institution of similar high character.

3. That the Regents are in favor of doing all they can in the interests of higher education throughout the State not inconsistent with the foregoing, and accordingly are willing to extend educational facilities at the Southern Branch in Los Angeles as rapidly as the need for such extended service is demonstrated.

4. Finally, that the Regents are prepared to add a third-year course in Letters and Science at the Southern Branch, beginning with the forthcoming September semester, if money is provided adequate to carry out the purposes of this extended service.

SCHOLARSHIP REPORT OF FRATERNITIES, SORORITIES, AND HOUSE CLUBS

Comparative scholarship averages indicate that the general scholarship record for the semester August to December, 1922, was 2.9550 for fraternities and men's house clubs, and 2.5704 for sororities and women's house clubs. The corresponding figures for the period August to December, 1921, were 2.9320 and 2.5179, respectively.

The standing of each organization is computed by adding the number of units of grade "A," twice the number of units of grade "B," three times the number of units of grade "C," etc., up to six times the number of units of grade "F," and dividing the sum of these products by the total number of units. "Incompletes" are rated equivalent to grade "E," and units for which grade "Passed" has been assigned are disregarded entirely.
